EVA	50.00

Please note that the boarding charge includes two pounds of TDI 10. This provides the necessary vitamins and minerals for an average mature horse at maintenance. The Grain Fee of \$3.00/day is applied when the horse needs additional energy to maintain or establish his or her ideal weight, for mares lactating or in late gestation.

Our Chute Fee's include all reproductive palpations, ultrasounds, artificial inseminations, semen collections, or coordination of semen shipments for up to three cycles until the mare or her recipient is 36 days in foal.
